## Game points for Ergonomics and Stability

- The new locking and unlocking mechanism is located directly above the ergonomic finger holes.
- The side walls are unlocked by simply pressing the unlocking button in the upper rim. Accidental unlocking is practically impossible.
- The short sides arrest when opened, therefore preventing independent closure.
- When opened, the two lid halves hinged to the long sides do not exceed the external dimension of the container.
- A matching label frame can be easily inserted on all four sides.
- The lid halves interlock when closed and can be secured to the box with a seal, if required.
- The box is designed to be very robust and torsion-resistant.
- Producible in two heights: 355 mm and 400 mm.
- The standard version is available with a smooth base and also available with a ribbed base upon request.
- Manufactured in Switzerland.

### 600 x 400 x 355 mm

Internal dimension base:	568 x 368 x 345 mm
Collapsed height:	89 mm
Usable int. height in stack:	324 mm
Volume:	67 litres
Weight:	4.25 kg

Order no.	Base	Lid
34-64-355-100	ribbed	without
34-64-355-102	solid	without
34-64-355-200	ribbed	2 on the long sidewalls
34-64-355-202	solid	2 on the long sidewalls

 = stock item

### 600 x 400 x 400 mm

Internal dimension base:	568 x 368 x 390 mm
Collapsed height:	89 mm
Usable int. height in stack:	369 mm
Volume:	77 litres
Weight:	4.51 kg

Order no.	Base	Lid
34-64-400-100	ribbed	without
34-64-400-102	solid	without
34-64-400-200	ribbed	2 on the long sidewalls
34-64-400-202	solid	2 on the long sidewalls
