# utz UPAL-U

*The new Euro pallet suitable for high-rack storage*

[utzgroup.com](http://utzgroup.com)

## Arguments in favour of the new UPAL-U

- The UPAL-U is used everywhere, where conventional wooden Euro pallets no longer fulfil the hygiene requirements
- Very well washable, thus also usable in clean rooms
- Very high running smoothness on roller conveyors, also usable on chain conveyors
- With steel reinforcement usable in high-rack storage
- In the non-reinforced version the weight is only 14 kg
- Runners with friction ridges for reduction of ground friction
- Material PP to increase the slip resistance of pallet on pallet and container on pallet
- The height of 150 mm corresponds to that of the wooden pallet
- The insertion widths on the short sides are exactly as with the wooden Euro pallet
- Standard version with two ergonomic reach-throughs
- An RFID transponder or barcode can be inserted or attached by request
- The hygienic alternative to the wooden Euro pallet

## utz UPAL-U

**External dimensions:** 1200 x 800 x 150 mm

**Material:** Polypropylene

**Standard colour:** light grey RAL 7001
